

## 10.3Gbps Thunderbolt™ Port and DisplayPort™ Switch

Check for Samples: [HD3SS0001](#)

### FEATURES

- **Compatible with Thunderbolt™ Technology Electrical Standards and DisplayPort™ 1.2a**
- **Wide –3dB Differential Bandwidth of Over 10GHz on 10G Path**
- **Supports DP and DP++ Configurations**
- **Handles HPD (5V tolerant) and Cable Detect**
- **Supports AUX and DDC MUX**
- **Excellent Dynamic Characteristics (on 10G path, typical values at 5GHz):**
  - Crosstalk = –35dB
  - Off-Isolation = –24dB
  - Insertion Loss = –1.5dB
  - Return Loss = –20dB
  - Intra-pair Skew Added < 4ps
- **Single 3.3V Power Supply**
- **Small 3x3mm 24-Pin QFN Package**
- **Low Power Consumption**
  - 3.3mW Typical Active Power
  - 80 µW Typical Detect Mode

### DESCRIPTION

The HD3SS0001 is a high-speed passive-switch device with integrated buffers and resistors, designed to support Thunderbolt™ technology, DisplayPort, and Dual Mode DisplayPort. The 10G path supports a high 10GHz bandwidth and excellent loss characteristics, while the DisplayPort path supports 5.4Gbps.

The integrated 3-pairs to 1-pair multiplexer (3:1 MUX) switches between DDC, AUX, and 10.3Gbps signals. The integrated 2-pairs to 1-pair multiplexer (2:1 MUX) switches between the Thunderbolt™ technology Low Speed UART transmit/receive pair and DisplayPort Main Link 1.

The MUXs are controlled by 4 input pins: TRI#, DP\_EN#, 10G\_EN, and CAD\_IN (cable detect from the connector). The HD3SS0001 is packaged in a small 3x3mm 24-pin QFN, operates from a single 3.3V supply, and supports an ambient temperature range of –40°C to 85°C.

### FUNCTIONAL DIAGRAM

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

Thunderbolt is a trademark of Intel Corp.

DisplayPort is a trademark of VESA Standards Association.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of the Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

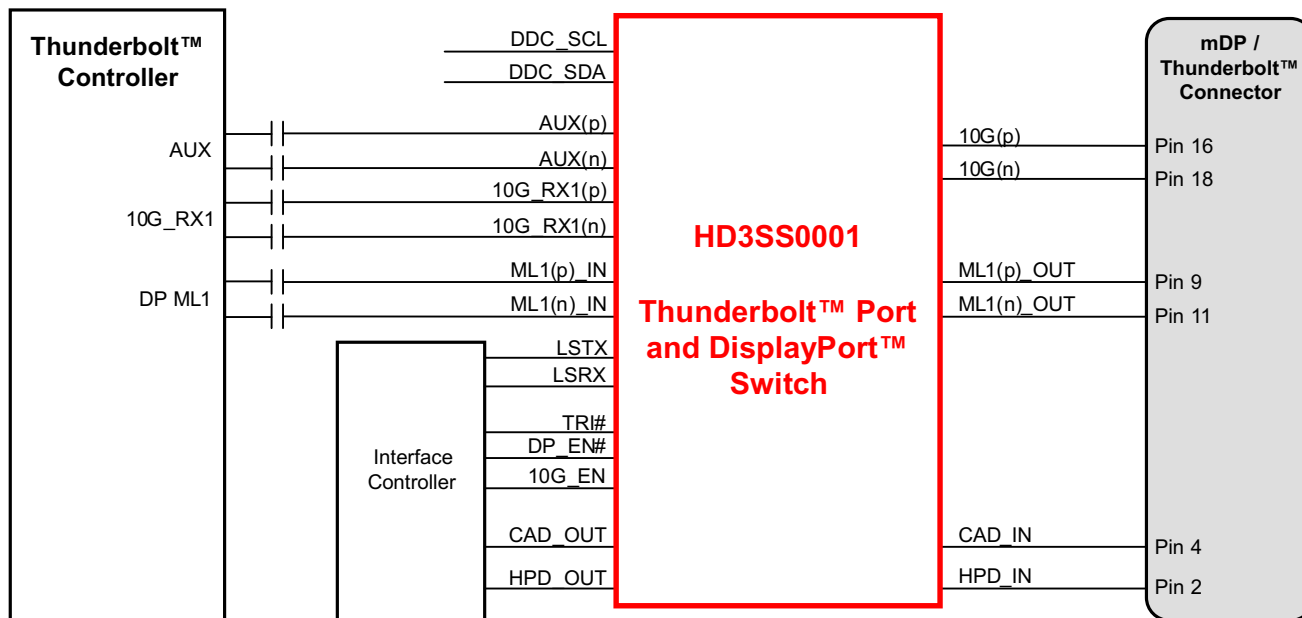

# HD3SS0001

SLAS827 – SEPTEMBER 2013

[www.ti.com](http://www.ti.com)

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

## TYPICAL APPLICATION

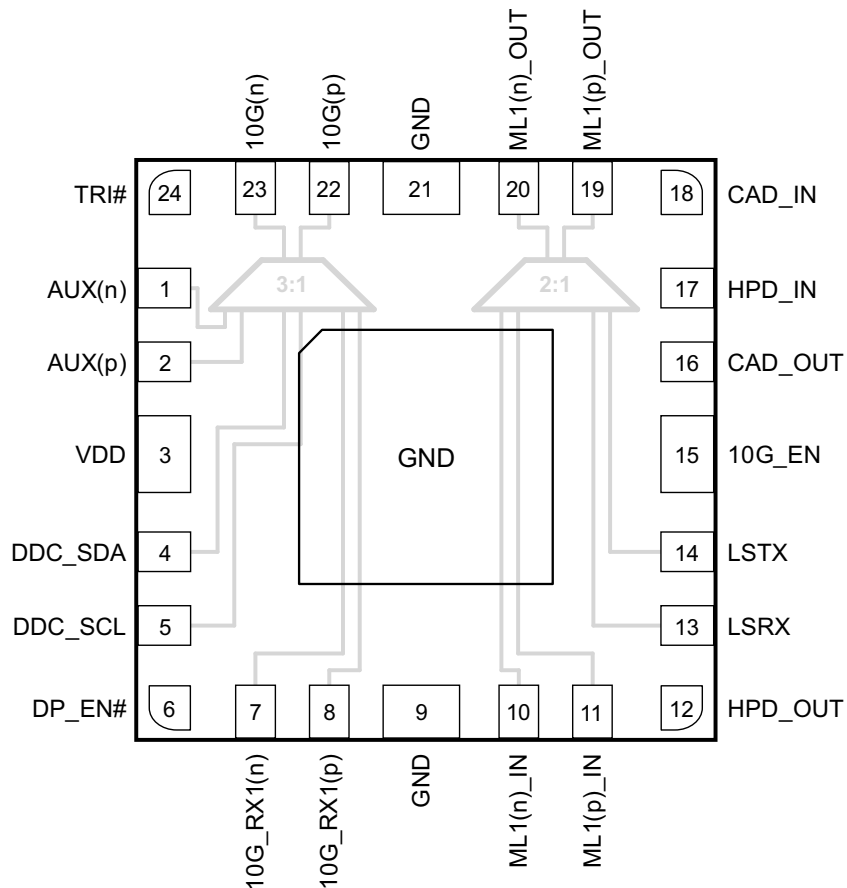

## TRUTH TABLE

MODE	LOGICAL INPUT TO SET <sup>(1)</sup>				EFFECT		
	TRI#	DP_EN#	10G_EN	CAD_IN	2:1 MUX SELECTION <sup>(2)</sup>	3:1 MUX SELECTION <sup>(2)</sup>	PULL-UP RESISTOR on 10G(n)
Thunderbolt™ Protocol	1	1	1	X	LS	10G	Disconnected
	0	1	1	X	LS	Tri-stated	Disconnected
DisplayPort	1	0	0	0	ML	AUX	Connected
	0	0	0	0	Tri-Stated	Tri-stated	Connected
TMDS	1	0	0	1	ML	DDC	Connected
	0	0	0	1	Tri-Stated	Tri-stated	Connected

[Invalid]	X	0	1	X	Tri-Stated	Tri-Stated	Disconnected

(1) "X" = Don't Care.

(2) MUX Selection names are abbreviated.

PACKAGE PINOUT  
(TOP VIEW)

MUX PIN MAPPING<sup>(1)</sup>

CONTROLLER-SIDE PIN	Connector-Side Pin
AUX(n)	10G(n)
DDC_SDA	
10G_RX1(n)	
AUX(p)	10G(p)
DDC_SCL	
10G_RX1(p)	
ML1(p)_IN	ML1(p)_OUT
LSTX	
ML1(n)_IN	ML1(n)_OUT
LSRX	

(1) NOTE: The HD3SS0001 can tolerate polarity inversions for the differential signals denoted by the (p) and (n) terminology, to ease potential board routing issues. LSTX/LSRX cannot be swapped, since LSRX is buffered and therefore unidirectional. Also, note that the integrated pullup on 10G(n) and the integrated pulldown on 10G(p) cannot be swapped.

**PIN FUNCTIONS**

PIN		I/O	SYSTEM SIDE	DESCRIPTION
NO.	NAME			
11	ML1(p)_IN	I	Controller	DisplayPort MainLink1(p) input
10	ML1(n)_IN			DisplayPort MainLink1(n) input
24	TRI#			Tri-State control (see <a href="#">TRUTH TABLE</a> )
6	DP_EN#			DisplayPort Enable, active-low (see <a href="#">TRUTH TABLE</a> )
15	10G_EN			10.3Gbps Mode Enable (see <a href="#">TRUTH TABLE</a> )
18	CAD_IN		Connector	Cable Detect
17	HPD_IN			Hot Plug Detect
2	AUX(p)	I/O	Controller	AUX Positive Signal
1	AUX(n)			AUX Negative Signal
5	DDC_SCL			DDC Clock
4	DDC_SDA			DDC Data
14	LSTX			UART TX Signal
13	LSRX			UART RX Signal
22	10G(p)		Connector	10G_RX1(p) or AUX(p) or DDC_SCL, with pull-down
23	10G(n)			10G_RX1(n) or AUX(n) or DDC_SDA, with pull-up
19	ML1(p)_OUT			DisplayPort MainLink1(p) output or LSTX
20	ML1(n)_OUT			DisplayPort MainLink1(n) output or LSRX
8	10G_RX1(p)	O	Controller	10.3Gbps Positive Signal
7	10G_RX1(n)			10.3Gbps Negative Signal
16	CAD_OUT			Cable Detect
12	HPD_OUT			Hot Plug Detect
3	V <sub>DD</sub>			Power supply
9, 21, Center Pad	GND	Power Supply		Reference ground

**ABSOLUTE MAXIMUM RATINGS<sup>(1)</sup>**

Over operating free-air temperature range (unless otherwise noted)

		VALUE		UNIT
		MIN	MAX	
Supply voltage range <sup>(2)</sup>	V <sub>DD</sub>	-0.5	4	V
Voltage range	Differential I/O	-0.5	4	V
	Control pin/buffers	-0.5	V <sub>DD</sub> +0.5	
Electrostatic discharge	Human body model <sup>(3)</sup>		±1,500	V
	Charged-device model <sup>(4)</sup>		±500	
Continuous power dissipation		See Power Characteristics		

- (1) Stresses beyond those listed under *absolute maximum ratings* may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any conditions beyond those indicated under *recommended operating conditions* is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
- (2) All voltage values, except differential voltages, are with respect to network ground terminal.
- (3) Tested in accordance with JEDEC/ESDA JS-001-2011
- (4) Tested in accordance with JEDEC JESD22 C101-E

## THERMAL INFORMATION

over operating free-air temperature range (unless otherwise noted)

THERMAL METRIC <sup>(1)</sup>		HD3SS0001	UNITS
		24-PIN VQFN (RLL)	
$\theta_{JA}$	Junction-to-ambient thermal resistance	41.5	°C/W
$\theta_{JCTop}$	Junction-to-case (top) thermal resistance	43.1	
$\theta_{JCbot}$	Junction-to-case (bottom) thermal resistance	6.3	
$\theta_{JB}$	Junction-to-board thermal resistance	11.2	
$\Psi_{JT}$	Junction-to-top characterization parameter	1.2	
$\Psi_{JB}$	Junction-to-board characterization parameter	11.2	

(1) For more information about traditional and new thermal metrics, see the *IC Package Thermal Metrics* application report, [SPRA953](#).

## POWER CHARACTERISTICS

over operating free-air temperature range (unless otherwise noted)

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX <sup>(1)</sup>	UNIT
$I_{DD}$	Supply Current in Active Mode	Outputs Floating		1.0	1.3	mA
$I_{DETECT}$	Supply Current in Detect Mode	DP_EN# = 1, 10G_EN = 0		26	50	μA
$P_D$	Power Dissipation in Active Mode			3.3	4.7	mW
$P_{Detect}$	Power Dissipation in Detect Mode			80	150	μW

(1) The maximum ratings are simulated for  $V_{DD} = 3.6V$ .

## RECOMMENDED OPERATING CONDITIONS

 Typical values for all parameters are at  $V_{DD} = 3.3V$  and  $T_A = 25^\circ C$ . (Temperature limits are specified by design)

PARAMETER	NOTES/CONDITIONS	MIN	TYP	MAX	UNIT	
$V_{DD}$	Supply voltage	3.0	3.3	3.6 <sup>(1)</sup>	V	
$T_A$	Operating free-air temperature	-40		85	°C	
$V_{IH}$	Input high voltage	CAD_IN, HPD_IN <sup>(2)</sup> , TRI#, DP_EN#, and 10G_EN	2.0		$V_{DD}$	V
		ML1(n)_OUT (when 2:1 MUX selects LS)	2.0		$V_{DD}$	
$V_{IL}$	Input low voltage	CAD_IN, HPD_IN <sup>(2)</sup> , TRI#, DP_EN#, and 10G_EN	-0.1		0.8	V
		ML1(n)_OUT (when 2:1 MUX selects LS)	-0.1		0.8	
$V_{OH}$	Output high voltage	CAD_OUT, HPD_OUT	2.7		$V_{DD}$	V
		LSRX (when 2:1 MUX selects LS)	2.7		$V_{DD}$ <sup>(1)</sup>	
$V_{OL}$	Output low voltage	CAD_OUT, HPD_OUT	0.0		0.1	V
		LSRX (when 2:1 MUX selects LS)	0.0		0.1	
$I_{IH}$	High-level input current	TRI#, DP_EN#, 10G_EN, CAD_IN, and HPD_IN; $V_{DD} = 3.6V, V_{IN} = V_{DD}$			5	μA
		ML1(n)_OUT; $V_{DD} = 3.6V; V_{IN} = V_{DD}$ (when 2:1 MUX selects LS)			3.75	
$I_{IL}$	Low-level input current	TRI#, DP_EN#, 10G_EN, CAD_IN, and HPD_IN; $V_{DD} = 3.6V, V_{IN} = GND$			100	nA
		ML1(n)_OUT; $V_{DD} = 3.6V, V_{IN} = GND$ (when 2:1 MUX selects LS)			100	
$V_{I/O\_Diff}$	Differential I/O voltage	AUX(p)/AUX(n), 10G_RX1(p)/10G_RX1(n), ML1(p)_IN/ML1(n)_IN, 10G(p)/10G(n), and ML1(p)_OUT/ML1(n)_OUT when MUX's are connected to Differential Signals.	0		1.8	Vpp
$V_{I/O\_CM}$	Common mode I/O voltage	AUX(p)/AUX(n), 10G_RX1(p)/10G_RX1(n), ML1(p)_IN/ML1(n)_IN, 10G(p)/10G(n), and ML1(p)_OUT/ML1(n)_OUT when MUX's are connected to Differential Signals.	0		2.0	V

 (1)  $V_{DD}$  range supports 3.0V to 3.6V, but for Thunderbolt products it is anticipated that the  $V_{DD}$  must be maintained at less than or equal to 3.4V to ensure that the  $V_{OH}$  on the LSRx do not exceed 3.4V.

(2) HPD\_IN is 5V tolerant.

## ELECTRICAL CHARACTERISTICS

(under recommended operation conditions)

PARAMETER	CONDITIONS	MIN	TYP	MAX	UNIT
<b>Thunderbolt™ Technology 10.3Gbps Link: 10G_RX1(p), 10G_RX1(n) <sup>(1)</sup></b>					
$R_L$	Differential Return Loss	$f = 5.0$ GHz	-20		dB
$I_L$	Differential Insertion Loss	$f = 5.0$ GHz	-1.5		dB

**PACKAGING INFORMATION**

Orderable Device	Status (1)	Package Type	Package Drawing	Pins	Package Qty	Eco Plan (2)	Lead/Ball Finish (6)	MSL Peak Temp (3)	Op Temp (°C)	Device Marking (4/5)	Samples
HD3SS0001RLLR	ACTIVE	VQFN	RLL	24	3000	Green (RoHS & no Sb/Br)	CU NIPDAU	Level-2-260C-1 YEAR	-40 to 85	3SS001	<b>Samples</b>

(1) The marketing status values are defined as follows:

**ACTIVE:** Product device recommended for new designs.

**LIFEBUY:** TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

**NRND:** Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

**PREVIEW:** Device has been announced but is not in production. Samples may or may not be available.

**OBSELETE:** TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

**TBD:** The Pb-Free/Green conversion plan has not been defined.

**Pb-Free (RoHS):** TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

**Pb-Free (RoHS Exempt):** This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

**Green (RoHS & no Sb/Br):** TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead/Ball Finish - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

**Important Information and Disclaimer:**The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

  - B. This drawing is subject to change without notice.
  - C. Quad Flatpack, No-leads (QFN) package configuration.
  - D. The package thermal pad must be soldered to the board for thermal and mechanical performance.
  - E. See the additional figure in the Product Data Sheet for details regarding the exposed thermal pad features and dimensions.

## THERMAL PAD MECHANICAL DATA

RLL (S-PVQFN-N24)

PLASTIC QUAD FLATPACK NO-LEAD

### THERMAL INFORMATION

This package incorporates an exposed thermal pad that is designed to be attached directly to an external heatsink. The thermal pad must be soldered directly to the printed circuit board (PCB). After soldering, the PCB can be used as a heatsink. In addition, through the use of thermal vias, the thermal pad can be attached directly to the appropriate copper plane shown in the electrical schematic for the device, or alternatively, can be attached to a special heatsink structure designed into the PCB. This design optimizes the heat transfer from the integrated circuit (IC).

For information on the Quad Flatpack No-Lead (QFN) package and its advantages, refer to Application Report, QFN/SON PCB Attachment, Texas Instruments Literature No. SLUA271. This document is available at [www.ti.com](http://www.ti.com).

The exposed thermal pad dimensions for this package are shown in the following illustration.

Exposed Thermal Pad Dimensions

4214706/D 08/13

NOTE: All linear dimensions are in millimeters

## IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.

### Products
