INDUCTORS

⇔TDK

Inductors for power circuits Wound ferrite VLS-CX-1 series

VLS3012CX-1 type

FEATURES

O Magnetic shield type wound inductor for power circuits using a ferrite magnetic material.

 \bigcirc High magnetic shield construction and compatible with high-density mounting.

O Larger current and lower Rdc were achieved by optimizing the ferrite core figure.

 \bigcirc Operating temperature range: -40 to +105°C (including self-temperature rise)

APPLICATION

Smart phones, tablet terminals, HDDs, SSDs, DVCs, DSCs, mobile display panels, portable game devices, compact power supply modules, other

* Rated current: smaller value of either Isat or Itemp.

Isat: When based on the inductance change rate (30% below the initial L value)

Itemp: When based on the temperature increase (temperature increase of 40°C by self heating)

REMINDERS FOR USING THESE PRODUCTS

Before using these products, be sure to request the delivery specifications.

SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using this products.

 The storage period is less than 12 months. Be sure to follow the storage conditions (temperature: 5 to 40°C, humidity: 10 to 75% RH or less). If the storage period elapses, the soldering of the terminal electrodes may deteriorate. 				
\bigcirc Do not use or store in locations where there are conditions such as gas	corrosion (salt, acid, alkali, etc.).			
 Before soldering, be sure to preheat components. The preheating temperature should be set so that the temperature difference between the solder temperature and chip temperature does not exceed 150°C. 				
 Soldering corrections after mounting should be within the range of the co If overheated, a short circuit, performance deterioration, or lifespan short 				
O When embedding a printed circuit board where a chip is mounted to a s the overall distortion of the printed circuit board and partial distortion successful distortion.				
 Self heating (temperature increase) occurs when the power is turned of design. 	ON, so the tolerance should be sufficient for the set thermal			
 Carefully lay out the coil for the circuit board design of the non-magnetic A malfunction may occur due to magnetic interference. 	shield type.			
\bigcirc Use a wrist band to discharge static electricity in your body through the g	grounding wire.			
\bigcirc Do not expose the products to magnets or magnetic fields.				
\bigcirc Do not use for a purpose outside of the contents regulated in the delivery	y specifications.
