

## Compression Connectors for Copper Conductors

**One-Hole Lugs — Standard Barrel Certified to 600 V and Recommended up to 35 kV<sup>‡</sup>**

**Material:** High-Conductivity Wrought Copper

**Finish:** Electro-Tin Plated

¥ For installations from 16 kV up to 35 kV, consult shielded cable manufacturers for stress relief and insulation requirements. Call your Regional Sales Office for sizes not listed.

Tooling: pp. E4–E62

Die Selector Chart: pp. E35–E50

## Compression Connectors for Copper Conductors

**One-Hole Lugs — 90° Standard Barrel Certified to 600 V and Recommended up to 35 kV¥ (cont'd)**

**Material:** High-Conductivity Wrought Copper

**Finish:** Electro-Tin Plated

## Compression Connectors for Copper Conductors

### Narrow-Tongue Lugs

#### Ideal for Confined-Space Terminations!

To meet increasing demand for smaller components in today's panels and switchgear, Thomas & Betts has expanded its line of Color-Keyed® Narrow-Tongue Lugs to include two-hole and angled lugs. These improved lugs have been precision engineered for consistency in width the entire length of the connector, from barrel to tongue, ensuring a reliable fit in confined-space applications.

#### Technical specifications

- Certified Rating: 600 V
- Recommended Rating: Up to 35 kV $\ddagger$
- Material: 99% pure high-conductivity seamless wrought copper
- Finish: Electro-Tin Plated
- Standards: UL Listed, CSA Certified and RoHS compliant

- Narrow-width tongue and barrel, engineered for dimensional consistency the entire length of the lug
- Perfect for connections in limited-space applications
- High-conductivity copper construction
- Electrolytically tin-plated finish resists corrosion
- T&B Color-Keyed® marking system makes connections and verification easy
- Double-chamfered barrel eases insertion of wire

#### Ideal for use in:

- Panels
- Switchgear
- Molded-case circuit breakers
- Motor starters
- Other limited-space OEM applications

### NOW AVAILABLE IN:

- One-hole
- Two-hole
- Straight
- 45° Angled
- 90° Angled

$\ddagger$  For installations from 16 kV up to 35 kV, consult shielded cable manufacturers for stress relief and insulation requirements.

## Compression Connectors for Copper Conductors

### Copper One-Hole Lugs — Certified to 600 V and Recommended up to 15 kV

These Color-Keyed® Connectors are recommended for up to 15 kV applications. Installed with standard T&B 14 and 15-Tons compression tools with special rounding dies, the compression forms the connector and conductor into a solid mass to provide an optimum electrical bond between connector and conductor. The rounding die-overlapped compressions provide a smooth round surface. This combined with the tapered barrel ends, addresses the control for potentially damaging electrical stresses of high voltages.

‡ For installations from 16 kV up to 35 kV, consult shielded cable manufacturers for stress relief and insulation requirements.  
 Applicable tools: 12, 14, 15 and 40-Tons (see tool section E4–E62).  
 \* Not UL Listed and CSA non applicable.  
 Die Selector Chart: pp. E35–E50

## Compression Connectors for Copper Conductors

**Cast Copper Two-Hole Lugs for Code Copper Cable — Certified to 600 V and Recommended up to 35 kV‡**

**Material:** High-Conductivity Wrought Copper

**Finish:** Electro-Tin Plated

Note: Some parts may not be current on the system. Consult your Regional Sales Office for informations.

Tooling: All hydraulic tools 12 tons and up.

For use mechanically splice traction motor wires. MES Flex (B) and DLLU.

\* Supplied with Elongated Bolt Hole.

## Compression Connectors for Copper Conductors

### One-Hole Metric Lugs

Color-Keyed® metric lugs are manufactured from electrolytic copper tube. The dimensions of the tube are designed to obtain the most efficient electrical conductivity and mechanical strength, resisting vibration and pullout.

Color-Keyed® metric lugs are annealed to guarantee optimum ductility, which is a necessity for compression connectors having to withstand severe deformation arising when compressed or bending of the tongue that may happen during installation.

Connectors have to perform adequately with vibration loads, and annealing is necessary to avoid material failure between the barrel and the tongue.

The presence of an inspection hole facilitates full insertion of the conductor, and the barrel length is designed to allow easy and accurate positioning of the dies during the crimping operation.

Lugs are electrolytically tin-plated to eliminate oxidation of the copper material. Color-Keyed® metric lugs complement our connector family and meet a growing need for customer's connector requirements. Details of the appropriate crimping tools and dies are included. Our Thomas & Betts Sales Representative group is always available to provide any technical advice required. Please contact them if sizes are needed additional to those shown in this catalogue.

## Compression Connectors for Copper Conductors

### Narrow-Tongue Metric Lugs

Color-Keyed® narrow-tongue metric lugs feature a contained tongue width.

Our lugs have been specifically developed for applications with L.V. circuit breakers with reduced space requirements. The tongue width allows a quicker and easier installation.

Color-Keyed® narrow-tongue metric lugs are manufactured from electrolytic copper tube.

The specific design of the barrel and dimensions create the best combination of mechanical strength and electrical conductivity.

Color-Keyed® narrow-tongue metric lugs are annealed to guarantee optimum ductility and are electrolytically tin-plated to avoid oxidation.

The barrel is provided with an internal chamfer for easy insertion of the conductor. The length allows easy positioning of the dies for proper crimping.

## Compression Connectors for Copper Conductors

### Two-Way Metric Splice Connectors

Color-Keyed® metric splice connectors are designed for joining low voltage conductors.

Made of electrolytic copper tube having similar dimensions to the Color-Keyed® metric lugs, these connectors are also annealed and electrolytically tin-plated.

They feature an internal chamfer at both ends. For easy insertion of the conductor, a center stop is provided to ensure correct positioning.

## Compression Connectors for Copper Conductors

### Two-Way Splice Connectors — Standard Barrel Certified to 600 V and Recommended up to 35 kV‡

**Material:** High-Conductivity Wrought Copper

**Finish:** Electro-Tin Plated

Two-way connectors provide high-pullout values, are easy to insulate and provide a low-resistance connection of high quality and low installed cost.

53515	350 kcmil	
53518	500 kcmil	
53523	750 kcmil	112

‡ For installations from 16 kV up to 35 kV, consult shielded cable manufacturers for stress relief and insulation requirements.  
 Use hydraulic tools with hex dies 13642M, 13400 and 21940.  
 Tooling: pp. E4–E62  
 Die Selector Chart: pp. E35–E50

## Constant O.D. enables faster, easier installation than contoured design

Thomas & Betts takes the splicing of different-sized conductors to a new level of economy and efficiency with Color-Keyed® Cast-Copper Reducing Splices. In addition to a lower cost, the key benefit to these splices is in their constant outer diameter.

Unlike screw-machined, externally contoured splices, Cast-Copper Reducing Splices require no change of tool or die between crimping each end. Just slide each wire easily into the chamfered barrel and use the same Color-Keyed® tool and die to crimp both ends. The consistent O.D. also makes these splices faster and easier to insulate with clear heat-shrink wrap than a contoured splice. Sand-cast construction ensures high-tensile strength for heavy-duty applications and tin-plated copper material provides high-conductivity and superior corrosion-resistance.

- Ideal for telecom (inside office/outside plant), commercial, industrial MRO, and any other certified to 600 V and recommended up to 35 kV applications requiring splicing of different-sized conductors.
- Tin-plated, sand-cast copper construction provides superior tensile strength, high-conductivity and excellent corrosion-resistance.
- Easier to install and insulate than screw-machined, contour-designed reducing splices.
- Constant O.D. saves time on installation by eliminating the need for crimp-tool/die change.
- Fast and simple to insulate with clear or coloured heat-shrink wrap.
- Chamfered barrel facilitates easy wire insertion.
- Compact, low-profile design takes up minimal space in cable tray or wire run.
- Simple installation with Color-Keyed® crimp tools (12, 14 and 15-Tons).

## Compression Connectors for Copper Conductors
