

Twin Industries cPCI Prototyping Boards are designed to support 3U and 6U cPCI development and test applications. All 2mm pressfit pins have dedicated plated holes for signal probing. Additional general purpose prototyping area with 0.1" x 0.1" grid.

FEATURES:

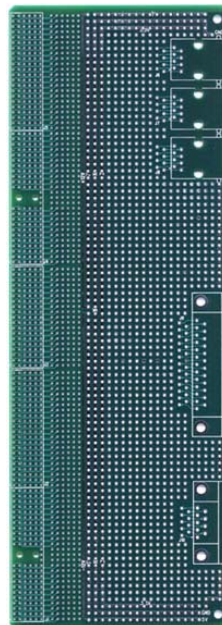

- Locations for 2mm pressfit connectors
- Plated holes: 0.037" for general prototyping
- FR4 laminate; 0.062" thick
- Locations for I/O connectors, mounting brackets, and bus bars for power and ground
