

3.96mm Pitch Connector Directly Mounted on Board

DF6 Series

■ Features

1. Service Efficiency Up

Conventional thick cables are directly mounted on the board piece by piece, but connectorization has achieved soldering services in a batch. This product enhances soldering service efficiency.

2. Miniaturization

This product achieves miniaturization for thick cables.

Mounting height on board : 7.5mm

Width : 4.6mm

3. Board Prefixed Mechanism

Since the connector is softly press-fitted to the board for insertion, it can be prefixed to the board.

■ Applications

Secondary power supply units for various equipment

■ Product Specifications

| | | | | |
|--------|----------------------------|---|-----------------------------|-----------------------|
| Rating | Current rating (Note 1) | AWG 18 : 5A AWG 20 : 4A AWG 22 : 3A | Operating Temperature Range | -35 to +85°C (Note 1) |
| | Voltage rating | 300V AC | Operating Moisture Range | 40 to 80% |
| | | | Storage Temperature Range | -10 to +60°C (Note 2) |
| | | | Storage Humidity Range | 40 to 70% (Note 2) |

| Item | Specification | Condition |
|---------------------------------|---|--|
| 1. Insulation Resistance | 1000M ohms min. | 500V DC |
| 2. Withstanding voltage | No flashover or insulation breakdown. | 1500V AC/1 minute |
| 3. Contact Resistance | 15m ohms max. | 100mA |
| 4. Vibration | No damage, cracks, or parts looseness. | Frequency: 10 to 55 Hz, single amplitude of 0.75 mm, 2 hours in each of the 3 directions. |
| 5. Humidity (Steady state) | No damage, cracks, or parts looseness. | 96 hours at temperature of 40°C and humidity of 90% to 95% |
| 6. Temperature Cycle | No damage, cracks, or parts looseness. | (-55°C: 30 minutes → 15 to 35°C: 10 minutes → 85°C: 30 minutes → 5 to 35°C: 10 minutes) 5 cycles |
| 7. Resistance to Soldering heat | No deformation of components affecting performance. | Flow: 250°C for 10 seconds |
| | | Manual soldering: 300°C for 3 seconds |

Note 1: The rated current will be changed according to cable sizes for use.

Note 2: Includes temperature rise caused by current flow.

Note 3: The term "storage" refers to products stored for long period of time prior to mounting and use. Operating Temperature Range and Humidity range covers non conducting condition of installed connectors in storage, shipment or during transportation.

Note 4: Information contained in this catalog represents general requirements for this Series. Contact us for the drawings and specifications for a specific part number shown.

◆ Precautions

| | |
|-----------------------------------|--|
| 1.Recommended soldering condition | Flow: 250°C for 3 seconds Manual soldering: 290°C for 2 seconds ■After soldering, if a load is given to the cable where connector and cable contain heat, the jacket holding member will be loosened. After soldering, the operation should be performed, after connector returns to room temperature. |
| 2.Cleaning condition | Refer to the "Nylon Connector Use Hand book". Don't use solvent to degrade the cable jacket like trichloroethane. In addition, avoid heat cleaning with solvent. |
| 3.Connecting condition | Refer to the "Nylon Connector Use Hand book". |
| 4.Precations | Slight discoloration on the insulating materials will not affect form, fit or function of the connectors. Refer to "Nylon Connector Use Handbook" |
