# 8mm 12MP Portrait Lens for M12 High-Quality Camera

Product ID: 5701

Description

This is the 8mm 12MP Portrait Lens, an essential for the M12 Raspberry Pi High-Quality Camera.

With its narrow angle-of-view and focal length, this lens is great for portraiture shots – especially to get that dramatic, blurred background composition. Includes a thumbscrew to quickly and easily assemble onto the HQ Camera Board.

For use with the M12 Raspberry Pi HQ camera only. We also carry a 2.7mm 12MP Wide Angle Lens and a 5MP 25mm Telephoto Lens.
