RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

- *Used with threaded fasteners (for example, a bolt or a nut), they are designed to increase the area of load distribution. When the threaded fastener is tightened, there is a risk of the surface becoming stressed. A washer helps spread the tightening forces applied over an even and increased area, reducing the risk of surface stress and damage. The bright zinc plated (BZP) finish offers resistance against corrosion. These washers conform to DIN 125A specifications.*
