## 1.2 Pin Description

Pin #	Name	Description
1	+VDC	<b>DC Output.</b> This pin provides the regulated output from the DC/DC converter.
2		
3	-VDC	<b>DC Return.</b> This pin is the return path for the +VDC output.
4	ADJ	<b>Output Adjust.</b> The output voltage can be adjusted from its nominal value, by connecting an external resistor from this pin to either the +VDC pin or the -VDC pin.
5	VIN+	<b>Direct Input +.</b> This pin connects to the positive (+) output of the input bridge rectifiers.
6		
7	VIN-	<b>Direct Input -.</b> This pin connects to the negative (-) output of the input bridge rectifiers.

Note 1: Typical figures are at 25°C with a nominal 48V supply and are for design aid only. Not Guaranteed

Note 2: The module can emit an audible noise, if operated at less than the stated minimum I<sub>LOAD</sub> and cause the PSE to fail its MPS.

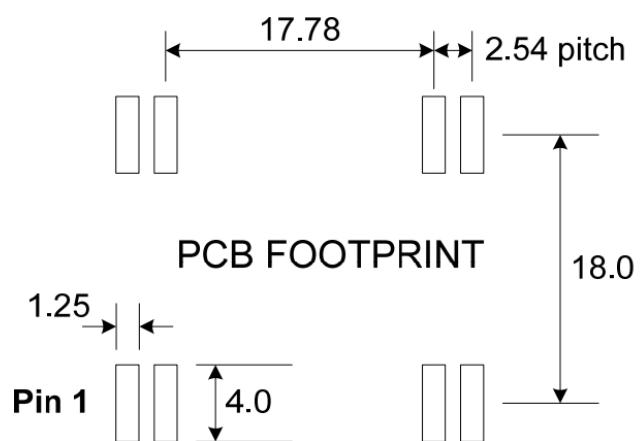

Note 3: >200mohm short due to thermal limitation.
