

High Input Voltage, Adjustable 3-Terminal Linear Regulator

Features

- ▶ 13.2 to 100V input voltage range
- ▶ Stable with 100nF output capacitor
- ▶ Adjustable 1.20 to 88V output regulation
- ▶ 5% reference voltage tolerance
- ▶ Output current limiting, 50mA min.
- ▶ 10 μ A typical ADJ current
- ▶ Over temperature protection
- ▶ Available in 3 different packages

Applications

- ▶ DC/DC SMPS startup circuits
- ▶ Adjustable high voltage constant current sources
- ▶ Industrial controls
- ▶ Motor controls
- ▶ Battery powered systems
- ▶ Power supplies
- ▶ Telecom applications
- ▶ LED drivers
- ▶ Automotive applications

General Description

The Supertex LR12 is a high voltage, low output current, adjustable linear regulator. It has a wide operating input voltage range of 13.2 - 100V. The output voltage can be adjusted from 1.20 - 88V, provided that the input voltage is at least 12V greater than the output voltage. The output voltage can be adjusted by means of two external resistors R_1 and R_2 as shown in the typical application circuits. The LR12 regulates the voltage difference between VOUT and ADJ pins to a nominal value of 1.20V. The 1.20V is amplified by the external resistor ratio R_1 and R_2 . An internal constant bias current of typically 10 μ A is connected to the ADJ pin. This increases V_{OUT} by a constant voltage of 10 μ A times R_2 .

The LR12 has current limiting and temperature limiting. The output current limit is 100mA maximum and the minimum temperature limit is 125°C. An output short circuit current will therefore be limited to 100mA maximum. When the junction temperature reaches its temperature limit, the output current and/or output voltage will decrease to keep the junction temperature from exceeding its temperature limit. For SMPS start-up circuit applications, the LR12 turns off when an external voltage greater than the output voltage of the LR12 is applied to VOUT of the LR12. To maintain stability, a bypass capacitor of 100nF or larger and a minimum DC output current of 500 μ A are required.

LR12 Typical Application

* Required for conditions where V_{IN} is less than V_{OUT}

Ordering Information
