

Wi-Fi Module for emPower Board Atmel ATWILC1000 (6.37.01)

6.37.01 WIFI MODULE FOR EMPOWER BOARD ATMEL ATWI

The Atmel ATWILC1000 is a link controller meant for usage with third party TCP/IP stacks providing IEEE 802.11b/g/n Wi-Fi support in a 2.4GHz band. The firmware of the ATWILC1000 is loaded from the host MCU. This provides an easy way of updating the Wi-Fi module firmware together with the host MCU firmware. The Wi-Fi firmware can be loaded from an external source as well.

Weight 0.5 lbs

Dimensions 6.25 × 4.25 × 1.25 in
