## Through Hole Lamp LTL2R3KE-002

### 1. Description

Through hole LEDs are offered in a variety of packages such as 3mm, 4mm, 5mm, rectangular, and cylinder which are suitable for all applications requiring status indication. Several intensity and viewing angle choices are available in each color for design flexibility.

#### 1.1. Features

- Low power consumption & High efficiency
- Lead free & RoHS Compliant
- Popular T-1 $\frac{3}{4}$  diameter
- AlInGaP Red Lamp & Red diffused lens

#### 1.2. Applications

- Communication
- Computer
- Consumer
- Home appliance
- Industrial

### 2. Outline Dimensions

#### Notes :

1. All dimensions are in millimeters (inches).
2. Tolerance is  $\pm 0.25$ mm (.010") unless otherwise noted.
3. Protruded resin under flange is 0.5mm (.02") max.
4. Lead spacing is measured where the leads emerge from the package.
5. Specifications are subject to change without notice.

## Through Hole Lamp LTL2R3KE-002

### 3. Absolute Maximum Ratings at TA=25°C

Parameter	Maximum Rating	Unit
Power Dissipation	75	mW
Peak Forward Current (Duty Cycle $\leq 1/10$ , Pulse Width $\leq 10\text{ms}$ )	90	mA
DC Forward Current	30	mA
Derating Linear From 50°C	0.4	mA/°C
Reverse Voltage	5	V
Operating Temperature Range	-40°C to + 100°C	
Storage Temperature Range	-55°C to + 100°C	
Lead Soldering Temperature [2.0mm (.079") From Body]	260°C for 5 Seconds Max.	

### 4. Electrical / Optical Characteristics at TA=25°C

Parameter	Symbol	Min.	Typ.	Max.	Unit	Test Condition
Luminous Intensity	$I_v$	90	200		mcd	$I_F = 20\text{mA}$ Note 1,5
Viewing Angle	$2\theta_{1/2}$		50		deg	Note 2 (Fig.6)
Peak Emission Wavelength	$\lambda_P$		632		nm	Measurement @Peak (Fig.1)
Dominant Wavelength	$\lambda_d$		624		nm	Note 4
Spectral Line Half-Width	$\Delta\lambda$		20		nm	
Forward Voltage	$V_F$		2.05	2.5	V	$I_F = 20\text{mA}$
Reverse Current	$I_R$			100	$\mu\text{A}$	$V_R = 5\text{V}$ , Note 6

#### NOTE:

1. Luminous intensity is measured with a light sensor and filter combination that approximates the CIE eye-response curve.
2.  $\theta_{1/2}$  is the off-axis angle at which the luminous intensity is half the axial luminous intensity.
3.  $I_v$  classification code is marked on each packing bag.
4. The dominant wavelength,  $\lambda_d$  is derived from the CIE chromaticity diagram and represents the single wavelength which defines the color of the device.
5.  $I_v$  guarantee must be included with  $\pm 15\%$  testing tolerance.
6. Reverse voltage ( $V_R$ ) condition is applied for  $I_R$  test only. The device is not designed for reverse operation.

## Through Hole Lamp LTL2R3KE-002

### 6. Taping Features

- \* Compatible with radial lead automatic insertion equipment.
- \* Most radial lead plastic lead lamps available packaged in tape and folding.
- \* 2.54mm (0.1") straight lead spacing available.
- \* Folding packaging simplifies handling and testing.
- \* Reel packaging is available by removing suffix "A" on option.

### Package Dimensions

Item	Symbol	Specification			
		Minimum		Maximum	
		mm	inch	mm	inch
Tape Feed Hole Diameter	D	3.8	0.149	4.2	0.165
Component Lead Pitch	F	2.3	0.091	3.0	0.118
Front to Rear Deflection	ΔH	--	--	2.0	0.078
Feed Hole to Bottom of Component	H1	17.5	0.689	18.5	0.728
Feed Hole to Overall Component Height	H2	25.9	1.020	27.5	1.083
Lead Length After Component Height	L	W0		11.0	0.433
Feed Hole Pitch	P	12.4	0.488	13.0	0.511
Lead Location	P1	4.4	0.173	5.8	0.228
Center of Component Location	P2	5.05	0.198	7.65	0.301
Total Tape Thickness	T	--	--	0.90	0.035
Feed Hole Location	W0	8.5	0.334	9.75	0.384
Adhesive Tape Position	W2	0	0	3.0	0.118
Tape Width	W3	17.5	0.689	19.0	0.748

**Through Hole Lamp**  
**LTL2R3KE-002**

**7. Packing Spec.**

2 reel per inner carton

Total 2,000pcs per inner carton

Tolerance:  $\pm 5\text{mm}$

6 Inner cartons per outer carton

Total 12,000 pcs per outer carton

In every shipping lot, only the last pack will be non-full packing

## Through Hole Lamp LTL2R3KE-002

### 8. Bin Table Specification

Luminous Intensity $I_v$ (mcd) $I_F@20mA$		
Bin Code	Min.	Max.
S1	333	333 UP
S2	222	333
S3	148	222
S4	90	148

Note: Tolerance of each bin limit is  $\pm 15\%$

Dominant Wavelength $\lambda_d$ (nm) $I_F@20mA$		
Bin Code	Min	Max
KE1	629.0	633.0
KE2	625.0	629.0
KE3	621.0	625.0
KE4	617.0	621.0

Note: Tolerance of each bin limit is  $\pm 1nm$

### 9. CAUTIONS

#### 9.1. Application

This LED lamp is good for application of indoor and outdoor sign, also ordinary electronic equipment.

#### 9.2. Storage

The storage ambient for the LEDs should not exceed 30°C temperature or 70% relative humidity. It is recommended that LEDs out of their original packaging are used within three months. For extended storage out of their original packaging, it is recommended that the LEDs be stored in a sealed container with appropriate desiccant or in desiccators with nitrogen ambient.

#### 9.3. Cleaning

Use alcohol-based cleaning solvents such as isopropyl alcohol to clean the LEDs if necessary.

#### 9.4. Lead Forming & Assembly

During lead forming, the leads should be bent at a point at least 3mm from the base of LED lens. Do not use the base of the lead frame as a fulcrum during forming. Lead forming must be done before soldering, at normal temperature. During assembly on PCB, use minimum clinch force possible to avoid excessive mechanical stress.

#### 9.5. Soldering

When soldering, leave a minimum of 2mm clearance from the base of the lens to the soldering point. Dipping the lens into the solder must be avoided. Do not apply any external stress to the lead frame during soldering while the LED is at high temperature.

#### Recommended soldering conditions:

Soldering iron		Wave soldering	
Temperature	350°C Max.	Pre-heat	100°C Max.
Soldering time	3 seconds Max. (one time only)	Pre-heat time	60 seconds Max.
Position	No closer than 2mm from the base of the epoxy bulb	Solder wave	260°C Max.
		Soldering time	5 seconds Max.
		Dipping Position	No lower than 2mm from the base of the epoxy bulb

Note: Excessive soldering temperature and/or time might result in deformation of the LED lens or catastrophic failure of the LED. IR reflow is not suitable process for through hole type LED lamp product.

#### 9.6. Drive Method

An LED is a current-operated device. In order to ensure intensity uniformity on multiple LEDs connected in parallel in an application, it is recommended that a current limiting resistor be incorporated in the drive circuit, in series with each LED as shown in Circuit A below.

Circuit model (A)

Circuit model (B)

(A) Recommended circuit

(B) The brightness of each LED might appear different due to the differences in the I-V characteristics of those LEDs.

## Through Hole Lamp LTL2R3KE-002

### 9.7. ESD (Electrostatic Discharge)

**Static Electricity or power surge will damage the LED.**

**Suggestions to prevent ESD damage:**

- Use a conductive wrist band or anti- electrostatic glove when handling these LEDs
- All devices, equipment, and machinery must be properly grounded
- Work tables, storage racks, etc. should be properly grounded
- Use ion blower to neutralize the static charge which might have built up on surface of the LEDs plastic lens as a result of friction between LEDs during storage and handing

**Suggested checking list:**

#### Training and Certification

- 9.7.1.1. Everyone working in a static-safe area is ESD-certified?
- 9.7.1.2. Training records kept and re-certification dates monitored?

#### Static-Safe Workstation & Work Areas

- 9.7.2.1. Static-safe workstation or work-areas have ESD signs?
- 9.7.2.2. All surfaces and objects at all static-safe workstation and within 1 ft measure less than 100V?
- 9.7.2.3. All ionizer activated, positioned towards the units?
- 9.7.2.4. Each work surface mats grounding is good?

#### Personnel Grounding

- 9.7.3.1. Every person (including visitors) handling ESD sensitive (ESDS) items wear wrist strap, heel strap or conductive shoes with conductive flooring?
- 9.7.3.1. If conductive footwear used, conductive flooring also present where operator stand or walk?
- 9.7.3.2. Garments, hairs or anything closer than 1 ft to ESD items measure less than 100V\*?
- 9.7.3.3. Every wrist strap or heel strap/conductive shoes checked daily and result recorded for all DLs?
- 9.7.3.4. All wrist strap or heel strap checkers calibration up to date?

Note: \*50V for Blue LED.

#### Device Handling

- 9.7.4.1. Every ESDS items identified by EIA-471 labels on item or packaging?
- 9.7.4.2. All ESDS items completely inside properly closed static-shielding containers when not at static-safe workstation?
- 9.7.4.3. No static charge generators (e.g. plastics) inside shielding containers with ESDS items?
- 9.7.4.4. All flexible conductive and dissipative package materials inspected before reuse or recycle?

#### Others

- 9.7.5.1. Audit result reported to entity ESD control coordinator?
- 9.7.5.2. Corrective action from previous audits completed?
- 9.7.5.3. Are audit records complete and on file?
